SUMMARY

Data Engineer with **4+ years** building cloud-native data platforms on **GCP** and **Azure**, specializing in **ETL/ELT pipelines**, **data warehousing** (**BigQuery**, **Snowflake**, **Databricks**), and **GenAI/Agentic AI** solutions.

EXPERIENCE

Best Buy India | *Software Engineer II (Data)*

April 2025 – Present

- Introduced **conversational analytics** that let business users get answers from large datasets by simply asking questions in plain English, empowering 50+ non-technical stakeholders to self-serve and reducing ad-hoc requests to the data team by 45%.
- Designed and implemented a **Snowflake Data Clean Room (DCR)** to establish a secure environment for joint analytics with vendor partners without exposing underlying raw data, enabling privacy-preserving collaboration.
- Built and consolidated large-scale datasets from multiple disconnected sources into a single, trusted source of truth, improving reporting speed by 40% and reducing data storage costs by 20%.
- Optimized existing data assets through **SQL** query tuning, efficient scheduling strategies, and performance improvements, reducing slot consumption and overall runtime by 25%.
- Modernized legacy datasets from on-premise systems by integrating multiple data sources into **Google BigQuery**, improving query performance by up to 40%.
- Built and optimized **CI/CD pipelines** to automate deployments across dev and prod environments, cutting deployment time by 30% and eliminating repetitive manual tasks.

Shell India Markets | *Data Engineer*

Oct 2021 – April 2025

- Engineered, optimized, and managed **ETL pipelines** using **Azure Data Factory** and **Databricks**, integrating **Delta Live Tables** and **Spark Streaming** for real-time data processing, resulting in a 25% reduction in data latency and a significant increase in pipeline reliability.
- Designed and streamlined an end-to-end data pipeline to consolidate multi-source datasets, boosting analytics efficiency by 40% and enabling faster decision-making processes.
- Architected and refined scalable data infrastructures, including data modeling and schema design, to support optimized data warehousing solutions, reducing query times by 40% and improving data processing efficiency by 30%, enabling seamless access for over 50+ end-users across analytics and reporting teams.
- Implemented custom data transformation functions based on business logic within ETL pipelines using **Python**, **SQL** and **PySpark**, optimizing data processing for efficiency and accuracy.

SKILLS

Languages: Python, PySpark, SQL, Java, C/C++, JavaScript, HTML/CSS

Cloud & Data Warehousing: Google Cloud Platform, Microsoft Azure, Snowflake, Snowflake Data Clean Rooms (DCR), Google BigQuery, Teradata

Data Engineering: ETL/ELT Pipelines, Apache Airflow, Databricks, Delta Lake, Spark Streaming, Data Modeling, Azure Data Factory, Azure Data Lake, Informatica, Ingestion Pipelines

AI/GenAI: Agentic AI, LangChain, ReAct Agents, LLM Orchestration, **Conversational Agents**, BigQuery ML, Gemini, Vertex AI, RAG, Prompt Engineering

DevOps & Tools: Git/GitHub, GitHub Actions, CI/CD, Databricks Asset Bundles, Azure DevOps, Azure LogicApps, Azure Functions, Looker Studio, Microsoft Power Platform, Unix Shell, MySQL

EDUCATION

VIT University, Vellore
B.E. Computer Science

June 2021

ACHIEVEMENTS

- Awarded the **Q3 2022 VP CIO Award** for the AskBrand Auto Approval project, projected to save Shell \$1.3M annually.
- Databricks Certified Data Engineer Associate**
- GCP Professional Data Engineer**
